MUWAHEED MUSTAPHA

SOFTWARE ENGINEER

FCT, Nigeria • muwaheedmustapha@gmail.com• +2348131818664
Portfolio-website • GitHub

PROFESSIONAL SUMMARY

Experienced Software Engineer with over 5 years of building scalable web and mobile systems across e-commerce, healthtech, and edtech domains. Specializes in full-stack engineering using React, Node.js, TypeScript, Laravel, and modern dev tooling. Known for architecting multi-tenant platforms, designing modular APIs, and collaborating closely with product teams and stakeholders to deliver user-centered systems. While most of my work is software-focused, I also have a background in Computer Engineering and a growing interest in applying embedded systems and AI integration

EDUCATION

BAYERO UNIVERSITY KANO **Kano, Nigeria**
B.ENG Computer Engineering
First Class Honours, CGPA: 4.74
Strong Foundation in systems programming, electronics and hardware-software integration

PROFESSIONAL EXPERIENCE

TESPIRE **FCT, Nigeria**
FULL STACK ENGINEER **DEC 2024-Present**

- Full-stack engineer working across two key products: a hospital management system (*Asibiti Health*) and a multi-tenant school management platform (*Tespire Basic*).
- Contributed to the design and implementation of backend services using Node.js (Express, tRPC) and Laravel.
- Built and maintained multiple front-end applications using React, Chakra UI, Astro and Vue for patient dashboards, school portals, and admin interfaces.
- Worked closely with product managers and designers to plan, scope, and deliver new features across both platforms. Participated in design reviews and roadmap planning.

AMIGO STUDIOS **Kano, Nigeria**
SOFTWARE ENGINEER **JAN 2024- DEC 2024**

- Developed a high-conversion PWA with React that improved user engagement by 70% and sales by 40%
- Built a scalable Express-based server supporting thousands of concurrent users
- Designed a reusable UI library using Storybook, NPM, and Figma
- Led the creation of a platform for managing products, and orders, and also providing actionable insights for stakeholders.
- Implemented features for product and user management, user trades, utility payments, and order tracking.

ASTOUND INNOVATION HUB **FCT, Nigeria**
SOFTWARE ENGINEER **SEPT 2022-Nov 2023**

- Led the development of a sports management and social media platform using the MERN stack
- Built a Tax Expert Listing platform with PHP
- Participated in code reviews, managed repositories, and supported CI/CD implementation across projects.

SEEDBUILDERS INNOVATION HUB **2022**

- Collaborated with a cross-functional team to develop business intelligence software with a focus on backend services.
- Worked with Python (Flask), SQL, and Pandas to support data extraction and reporting workflows.

GALAXY BACKBONE LTD **2021**

- Participated in a 3-month internship program focused on enterprise network security and monitoring.

- Gained experience with email security appliances, network infrastructure auditing, and access control management.

PROJECTS

ThermoTrack – Industrial Inspection App

- Developed a cross-platform mobile app using React Native and Expo for collecting and managing industrial inspection data in offline-first environments.
- Built a modular form builder system and implemented local storage and synchronization using Zustand and SQLite.
- Integrated features like QR/NFC scanning, PDF report generation, and dashboard analytics.

ElitePoint – Loyalty Coalition Platform

- Designed and developed backend services for a multi-tenant loyalty and rewards platform serving multiple business partners.
- Worked with NestJS, MongoDB, and Redis to build transactional and user-facing modules, including role-based access and points tracking.

SKILLS

JavaScript / TypeScript

I have worked with JavaScript and TypeScript throughout my career for both frontend and backend development. I use them with frameworks like React, Next.js, and React Native on the frontend, and Node.js, Express, and NestJS on the backend. I've also used them for writing test suites and building reusable UI libraries.

Backend Engineering

Experienced in designing RESTful APIs and backend systems using Node.js, Laravel, and NestJS. I work with PostgreSQL, MongoDB, and MySQL, and have used ORMs like Prisma and Sequelize for modeling and querying complex schemas.

Frontend Development

Fluent in React, React Native, Chakra UI, Tailwind CSS, Vue and Astro.js for building responsive and accessible interfaces. I enjoy creating component-based systems and working closely with design teams.

API Design & Documentation

Designed and documented APIs using OpenAPI, tRPC, and Laravel Passport.

DevOps & Tooling

Comfortable with Docker, Git, GitHub Actions, and Redis for development and deployment workflows. I have set up CI/CD pipelines and worked with Digital Ocean and Azure in production environments.

Testing and Monitoring

I've used Jest, Playwright, and ESLint to maintain code quality, and integrated Pino and Sentry for logging and monitoring in production systems.

Collaboration

Worked in Agile teams, contributing to sprint planning, design reviews, and mentorship.

Hardware/Embedded Exposure

While most of my work is in software, I have hands-on experience with prototyping IoT systems using ESP32, sensors, and microcontroller peripherals, which I enjoy exploring in personal projects.

RESEARCH INTERESTS

Edge Computing & Real-time Applications, Intelligent Systems Design, IoT in education and Healthcare, AI integration
